

The histogram displays the frequency distribution of values across different categories. The x-axis is logarithmic, with major ticks at $1e-07$, $1e-06$, and $1e-05$. The y-axis represents frequency, with a red line at the bottom. The distribution is multimodal, with peaks at various categories. The colors of the bars are: green, cyan, red, olive, green, magenta, red, blue, purple, orange, cyan, and magenta.

Category (approx. x-value)	Frequency (approx. y-value)	Color
1.5×10^{-7}	4	Green
1.5×10^{-7}	3	Cyan
3×10^{-7}	2	Red
5×10^{-7}	4	Olive
5×10^{-7}	3	Green
1.5×10^{-6}	2	Magenta
1.5×10^{-6}	2	Red
3×10^{-6}	3	Blue
3×10^{-6}	2	Purple
5×10^{-6}	3	Purple
5×10^{-6}	2	Green
5×10^{-6}	3	Cyan
8×10^{-6}	5	Orange
8×10^{-6}	3	Cyan
1.5×10^{-5}	2	Magenta
